In case you were wondering, my website was created with Jimdo. Jimdo is very nice.

Well, I don't mean to brag, but my website will probably be the best you'll see in a while.

A fun thing that you can do on my website is go to my  page and zoom alllllllllllll the way out.

Also, I have a favicon. A favicon really helps make your website look cool. Take konamicodesites.com for example. Really cool site, no favicon.

THX!!!! If you have any other questions, here. Hope you enjoyed,
